Who we are?

Being a System Integrator, ConvoSync is committed to boost the organizational effectiveness of its customers by efficiently providing cost-effective, optimal and integrated IT solutions and services. We strive to ensure customer satisfaction with excellence in services. Helping our clients get the most out of their investments in technology infrastructure remains our top priority.

What offer you is the very best that the systems integration industry has to offer!

10
years of experience

25
professional experts

200
satisfied customers

500
successful projects

MISSION STATEMENT

We aim at becoming a globally renowned system integrator & design solutions company by offering the best quality IT and connectivity services to businesses.

PHILOSOPHY & VISION

The simplified and customized solutions and high quality customer services that we offer is what makes us stand apart from the rest of the crowd!

Our field of expertise include:ICT Solution, Tele-com Infrastructure, Mobility Solution, Managed Services and resources, Digital Infrastructure, Data Center Solutions, FTTx Service, Structured Cabling, Network Security Provider, VOIP Service, SEO, Web Development & Project Management.

ConvoSync is a trustworthy name among the top system integrator & design solutions company in the region. With a team of dedicated technical professionals who offer the best services, Convo-Sync remains a leading system integrator & design solutions company in the global market.

Our client-base spreads across sectors like Health-care, Education, Retail, Hospitality and NGO. Our unique personalized services driven by customer requirements, expectations and budget is what makes us standout!

OUR
SOLUTIONS

We combine the latest technologies with original in-house designs to develop customized and advanced solutions to meet the client requirements. ConvoSync offers solutions such as ICT Solutions, Data Centre Infrastructure Solutions and Cloud Infrastructure Solutions.

ICT Solutions

ConvoSync has the expertise and vendor relationships to deliver compute platforms that balance these sometimes-conflicting objectives and precisely meet your business and IT requirements.

Our ICT solution offerings include the following but not limited to:

1 Converged Infrastructure

2 Server Consolidation

3 Unified Infrastructure Management

4 Enterprise Storage

5 NAS and SAN Storage

Data Center Infrastructure Solutions

The physical data center infrastructure forms the skeleton of your IT environment. It requires thoughtful design and quality products to support your business requirment.

Our Data Center Infrastructure solution offerings include the following but not limited to:

1 / Data Center Design, Build Up & Support

2 / Disaster Recovery

3 / Business Continuity

4 / Data Center Infrastructure Management (DCIM)

5 / Facilities – UPS, Raise floor ,Containment

Cloud Infrastructure Solutions

ConvoSync offers Virtual and Dedicated Private Clouds. Virtual Private Clouds help users to have the flexibility to manage their resources in their environment according to their business needs.

Our Cloud infrastructure solution offerings include the following but not limited to:

Microsoft Office 365

Cloud Services: Create highly-available, infinitely-scalable cloud applications and API's

Azure Active Directory: Synchronize on-premises directories and enable single sign-on

OUR
SERVICES

ConvoSync has been a constant name among the top system integrators. If you're on a lookout for the best ICT solutions provider or intercom ICT solutions, we're the ones to call!. As experienced system integrators, design and technology services are also fall under our field of expertise. With a long list of satisfied customers, we have proven our excellence in IT infrastructure, cybersecurity, ELV services, Integrated Building Management, GIS, Web & Software Development, Technical Training, and much more. We provide you with the best IT facility management services and ICT solutions.

IT Infrastructure

More than just neat and organized wiring & structured cabling, we offer a comprehensive and customized system based upon the standards EIA/TIA in conjunction with the ANSI.

1 Passive Infrastructure

2 Structured Cabling

3 OSP, FTTx Fiber Cabling

Cyber Security

With the rapid technological advances, increased market pressures and growing sophistication in security threats, businesses in today's world are expected to be constantly vigilant and pre-emptive. Our highly experienced and qualified security professionals at ConvoSync leverage decades of experience, deep industry knowledge and business-process know-how to protect your business against threats and minimize risks.

Advanced Security for Business

1

1 Network Audit & Monitoring

Advanced Threat Protection

2

2 Email & Web Security

Endpoint Control & Security

3

3 Network Security & Design

Managed Services

ConvoSync Solutions accelerates to drive your managed-services engagement and effectively reach business goals and helps you optimize your current business needs.

1 Infrastructure Management Services

2 Windows, UNIX/Linux Centric Design & Deployment

3 CMS Design & Deployment

4 Data and System Management

5 Managed Web Services

ELV Services

We use a combination of strategy plus cutting-edge technologies. Here are some facts about ELV systems. ELV systems run on a parallel power source. Moreover, all buildings are powered by a primary electric source.

- KNX Lightning Control System
- System Fire Alarm
- Access Control System
- Closed Circuit Television System (CCTV)
- Public Address & Voice Alarm System (PAVA)
- Integrated Security Management System (ISMS)

Integrated Building Management System

IBMS automates and integrates the various sub-systems of a building on a single platform. It brings together all the electro-mechanical systems such as HVAC, Lighting, Plumbing, STP, Fire Fighting & Fire Alarm, etc. installed in a facility along with most commercially available sensors and controllers on a centralized system.

Coalesced Integration will all Protocols
Integrated Alarm supervision
Interface with asset management
Unified monitoring and controlling
Remote Administration
Centralized collection of live data

GIS Services

ConvoSync provides numerous GIS services to its clients all over the world. The GIS services rendered by ConvoSync allow for the visualization of geographic data, analysis of spatial relationships, and efficient data management.

Custom geospatial and GIS development
Data capture and conversion
Geoprocessing and geocoding
GIS database design
3D GIS mapping and modeling

Web & Software

Development Services

We have a team of Web and Software Development specialists consistently delivering outstanding results combined with creative ideas through our vast experience.

Web Design & Development
Web Application Development
Mobile Application Development. (Android/iOS)
Software Development
e-Commerce Systems
Accounting and Billing Systems

IP Telephony Services

We provide IP Telephony services such as Unified Communication, Call & Contact center Solutions, Messaging, Voice and Non-Voice Support Solutions, Customer Feedback Solutions and much more. An agile & flexible enterprise communications solution provider that delivers apace with industry's growth.

Our Collaboration solutions offerings include the following but not limited to:
1. IP Telphony | 2. IVR | 3.Unified Communication | 4.Call center and contact center

Internet of Things (IoT)

Internet of Things (IoT) is making the world better and is commonplace in all walks of life. Unlocking its full potential, you will know that it connects everyone and everything. IoT enables companies to revamp their business needs by delivering exemplary IoT solutions. We allow organizations to:

1 Improve decision making

2 Scale with efficiency

3 Design and develop end-to-end IoT processes while deploying and managing them efficiently

4 Analyze the new data and act on it

5 Integrate IoT solutions seamlessly

6 Transform business processes

IT Project Management

The success of a project depends upon the team productivity and team management. With the burden of meeting the deadline for the project, it becomes imperative to see the larger picture and manage the tasks to fulfill every need of the project. You must always have project management tools to eliminate the superfluous disarray related to project management. Successful project management is indispensable for companies. Here at ConvoSync Solutions, we manage the projects by:

- *Combining workflow tools at a place to enhance project planning, tracking time, and task management.*
- *Using cloud-based technology that fosters seamless collaboration with easy implementation. It promotes scalability and flexibility during the process.*
- *Collaborating teams through constant communi-* *cation. It optimizes the sharing of documents and other important information to monitor the progress of the project.*
- *Using a project management software that allows accurate documentation of project documents.*
- *Scheduling and organizing team meetings.*
- *Keep track of the budget and possible issues for better productivity.*

IT Configuration Management

IT configuration management allows management, organization, & control of the changes in the documents of the project. It helps in minimizing mistakes and boosting productivity. It also helps in maintain one coordination between the stakeholders. Moreover, you won't spend a huge amount on making changes to the system. The configuration audits validate that the software fulfills the baseline needs. The auditors conduct configuration auditing to ensure that it satisfies the goals of configuration management.

The team of ConvoSync Solutions ensures that there is synchronization, concurrency, and version control while the software updates continually. When changes occur in the configuration object, we ensure consistency and quality through change control. Prior tracking of the changes helps to detect problems and prevent you from paying high costs. Our team tracks each release during the configuration management process through configuration status accounting.

Enterprise Performance Management

With the growth of your business, operating it becomes more complex. Eventually, you experience a reduced ability to adapt to a rapidly changing business environment. To maintain the pace of your business and stay ahead in the race, you need to implement a system that connects your plans with proper execution and performance analysis. EPM allows for real-time data availability. It helps establish an understanding of the market trends and the actions of your competitors. This helps in responding swiftly and fulfilling the business objectives.

EPM offers benefits like a recording of data, calculation, and sharing of data. You get more comprehensive information. It is now available as cloud-based software that is easy to use, reduces additional costs, and offers accessibility & security. This allows aligning with business goals like financial and strategic goals. ConvoSync Solutions provides EPM

solutions to support your management cycle. We carry out:

- *Budgeting*
- *Goal setting*
- *Planning*
- *Forecasting and modeling*
- *Consolidation of results*
- *Reporting*
- *Performance Analysis*

OUR INDUSTRIES

Our technical solutions serve various industries and cater to the needs of different types of organizations. We provide the necessary IT infrastructure to enable small and large businesses to grow and explore new business initiatives. Our services help businesses ensure IT compliance, minimize environmental impact, and reduce operational costs and legislative and regulatory barriers. You can find out more about how different clients benefit from our services by exploring the industries below.

Finance & Banking

The industries providing finance and banking services are glimpsing unparalleled forces of change from stern regulations to fierce competition following ever-transforming customer needs. To boost customer loyalty and augmented functional efficiency, the financial organizations are looking to execute the best Banking IT services. Convosync is a trusted technology partner for a significant number of Financial and Banking service organizations. We provide Web and Mobile Development Services for customized web applications that provide your customers with seamless banking experience. Our team offers solutions focusing on your digital adoption with cloud enablement for building up infrastructure and cybersecurity for the protection of services.

Telecom

In the digital age, business agility is one of the prerequisites of telecom operator success. Convosync offers a vast array of professional IT services. Our end-to-end solutions increase efficiency, foster innovations, and drive cost reductions through a comprehensive approach. We provide Cloud Infrastructure Solutions for storage and easy access to data.
Our IT Infrastructure Services include OSP and Telecom Distribution System. You will have an exceptional experience locating the regions with ease of access through our GIS services. We assess your communication requirements and come up with a customized solution for it. So, give your business a competitive advantage with our customized telephony services that are equally affordable.

Healthcare

IT services in the healthcare sector evolve at a high pace with mobile applications revolutionizing the industry for business management. We bridge the gap that remains between you and technology and pave the way to turn your dreams into technology that cuts down the competition. Our Cloud Infrastructure offers you access to the patient's information and records while protecting it with Cybersecurity Services. Our IP telephony services enhance the communication between you and your patients while the high-end software solutions provide technologies to achieve health equity with the help of our healthcare app developers. Our team provides your healthcare app development solutions for recording, analyzing, and sharing patient information.

Government & NGOs

Convosync enables government organizations to streamline the processes and infrastructure, manage human resources in a better way, enhance efficiency & productivity, and utilize allocated budgets optimally. We provide a platform for the government to easily connect with its citizens and enhance accountability

and transparency. Our team delivers facilitated and well-equipped data centers to our customers. Our Cloud Infrastructure services provide assistance to the NGOs and government for the storage of data in a cost-effective manner that inculcates speedy delivery of the varying digital services.

Construction

Comfort level is the prime requisite for anybody who lives in a building. It is crucial that you have the right BMS to meet your requirements. IBMS solutions have become an essential implementation in industries and buildings of any nature. Convosync partners with the best industry leaders when it comes to providing the best IBMS solutions to their

esteemed customers. Through IBMS, we offer services for Lighting Control, HVAC Control, water management systems, elevator interface, and other utility management systems. With these services, you have the facility management solutions and safety & security systems fastened up for providing you full control of the building.

Transport & Aviation

The aviation and transport GIS solutions at Convosync help to manage the complicated systems efficiently. Managing the daily operations of transport and airlines is an arduous challenge. Our Transport Management System (TMS) solutions lessen the workload and bring

high returns on investment (ROI). This results in great savings on freight services. We help engineer a system that includes well-integrated modules for route and delivery optimization, carrier management, and freight payment.

Energy & Environment

Convosync accelerates your time-to-market with cloud-enabled solutions. With the development of cloud technology, environment & energy practices have evolved into remote management with the use of cloud services for visualization, analytics, and machine learning. We provide IoT solutions for energy & environment markets to make data integration easy and smart data management. IoT devices reveal the operation status of the facilities and machines for efficient remote management. With a robust design, our services fulfill the needs of multiple applications while bridging the gap between IT and OT.

Agriculture

Convosync services and solutions help the agriculture ecosystem to fulfill the potential. Analytics and technologies are bringing about a great transformation in agriculture that makes farm-field operations efficient. Digital-based agriculture services help to boost the yield and improve financial performance. We combine digital technologies with visualization capabilities, analytics, and industry knowledge to help farmers increase profitability and productivity. We have the best, innovative solutions through the use of IoT for smart farming that captures the data. IoT based remote sensing uses sensors for gathering data and transmitting it to the analytical tool for analysis. Our solutions help you gain insight for managing the farm operations and storing the data in the Cloud Software.

Oil & Gas

The pace of change in the oil & gas sector is increasing with the onset of the digital revolution. Convosync offers comprehensive solutions and services to the companies dealing in the oil and gas sector for enhancing the digital customer experience. We help you attain your business goals through Cloud Computing Services. You can conduct real-time monitoring, improve security & safety, and optimize operations with our end-to-end IoT solutions. Use digital maps through our GIS services that make your company cost-efficient. We provide Digital Management Solutions for real-time incident management and our Cybersecurity Services to protect your financial assets.
